SUMMARY

Innovative Game Developer and C# Programmer with a strong foundation in building scalable, data-driven game systems. Proficient in Unity and Godot, with hands-on experience utilizing advanced design patterns including Scriptable Object Architecture (SOAP), Observer, and Factory Patterns to create maintainable and dynamic codebases. Adept at turning creative concepts into polished realities through rigorous debugging, UI/UX integration, and a player-first development approach. Experienced in other technical fields such as Video editing and 2D pixel art.

EXPERIENCE

C# Unity Programmer Intern, NinteySix Studios

Decemeber 2025 - March 2026

Nunez Street, Malakas, General Santos City, 9500, South Cotabato

- Collaborated with the development team to build and refine core gameplay mechanics, writing clean, well-documented C# code.
- Engineered scalable and maintainable game architecture using C# Observer Pattern, Interfaces, Service Locators, Factory design pattern and etc. to streamline object creation.
- Designed modular, data-driven systems utilizing Scriptable Object Architecture Pattern (SOAP) to allow easy balancing and tweaking by designers.
- Utilized C# Reflection to dynamically inspect and manipulate object properties at runtime, creating more flexible and robust game systems.

Unity C# Programmer, Game Jam Projects

2023 - 2026

Projects: Fruited to Return (thatgamejam #01), Frigg's Grill n Thrill (Top 30 Scream Jam 2024),

- Consistently engineered core gameplay loops, mechanics, and UI systems across multiple game jams within strict 48- to 72-hour deadlines.
- Adapted to diverse game genres from roguelite precision platformers to horror simulations utilizing clean, modular C# architecture in Unity.
- Collaborated with teams and worked solo to rapid-prototype, debug, and polish mechanics to ensure fully playable and balanced submissions.

GDScript Godot Programmer, Game Jam Projects

2023 - 2025

Projects: Michelle (Top 10 Scream Secrets 2024), Plate Pals (Micro-Jam: Food 2025)

- Built dynamic systems including narrative-driven event triggers for psychological horror and order-management quotas for simulation games.
- Developed highly-rated 2D pixel art games from scratch using Godot and GDScript under extreme time constraints.

SKILLS

- | | |
|-------------------------------|--------------------------|
| • C# Unity Developer | • Script & Story Writing |
| • GDScript Godot Developer | • QA Game Tester |
| • Front-End Web Development | • Video Editor |
| • UI/UX Design (Figma, Canva) | • Level Design |

PROJECTS

- | | |
|--|---|
| • M2VEX: FMV School Tour of MMCM | • Fruited To Return: 2D Precision Platformer, Roguelite |
| • Cat Connect: Cozy 2D Pixel Game | • Plate Pals: 2D Delivery Game |
| • Sherlock Science: Educational 2D Game for kids | • Frigg's Grill and Thrill: Horror Cooking Game |
| • Blacksmith: A Blacksmith Simulation Game | • Michelle: 2D Pixel Horror Game |

EDUCATION

Bachelor of Science in Entertainment and Multimedia Computing

2022-2026

Mapúa Malayan Colleges Mindanao

Science, Technology, Engineering, and Mathematics

2018-2020

Mapua Malayan Colleges Mindanao
